## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-12,18-22 are allowed.

### ***Response to Arguments***

Applicant's arguments with respect to claims 13-17 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Johnson '946. Figure 9 of the patent shows a cutting bit having an inclined surface 17 with part of the surface being obliquely inclined.

### ***Claim Rejections - 35 USC § 103***

Claims 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson. The exact angles of inclination would have been obvious design choices for one of ordinary skilled in the art to provide for the desired results. The use of carbide wear tips is well known in the art and of no patentable merit.
